Gas pipeline leaks due to reckless digging, says GAIL

Authority embarks on safety awareness drive about leaks

BENGALURU, DHNS: Frequent incidents of piped gas leakage in various parts of the city has prompted the Gas Authority of India Limited (GAIL) to embark on a safety awareness drive involving the major civic bodies, including BBMP, BWSSB, Bescom and others.

The GAIL officials have attributed the previous incidents of leakage to the reckless excavation work taken up by various civic agencies without availing its permission.

Giving details on the safety precautions adopted by the authority to avert such incidents, Vivek Wathodkar, chief general manager, GAIL, said the authority has always installed safety markers while laying the pipeline as a standard practice with directions 'dial before digging'.

"Our engineers and staff regularly conduct line patrolling. But there is an utmost need to follow safety guidelines before starting any digging activities in the name of public utility services," he explained.

According to Wathodkar,

GAIL executive director P Murugesan greets Deputy Commissioner of Police (North East Division) Kala Krishnaswamy at a workshop on 'Pipeline Safety' in the city on Tuesday. DH PHOTO/JANARDHAN B K

the authority has been holding safety awareness programmes for public utilities like the BBMP, Bescom, BWSSB, BM-RCL besides sensitising Resident Welfare Associations.

Wathodkar said: "The rise in incidents is due to unauthorised third party interventions of different public utility appointed contractors and agencies which have undertaken digging and excavation work recklessly without permissions."

Further stressing on the safety measures adopted by GAIL, officials revealed about beefing up the six control rooms in Bengaluru with six

emergency response vehicles for each control rooms.

P Murugesan, Executive Director (southern region) GAIL said: "To keep a tab on unauthorised excavation work we are conducting helicopter patrolling every month, and we are waiting for the approval to start patrolling through drones. Foot patrolling is already in practice. Besides this, the GAIL engineers have been designated different areas to assess the health of pipeline."

GAIL officials requested public cooperation to stop unauthorised excavation work, where such informers would be rewarded.

Accidents due to pipeline damage

- April 2017** Bylanes of Garebhavipalya in Hosur road erupted in flames. The BWSSB dept was laying sanitary pipe there
- October 2018** Gas pipeline leak in Whitefield due to digging work done by the BMRCL
- January 2019** Gas pipeline leak reported on Sarjapur road during the BBMP excavation work
- February 2019** In last week of the month, four children were injured and at least five houses, as well as vehicles, were damaged due to a blast on a site where the Bescom workers had allegedly taken up work next to a GAIL gas pipeline in Muneshwara Layout.
- March 2019** Fire in Singasandra following the leak in the gas pipeline. As the pipeline was exposed, following some drain work that was taken up nearby, the official said some rag pickers set fire to some waste.
